

VRICON EXPLORER: FAQs

Q. What is Vricon Explorer?

A. Vricon Explorer is a software developed by Vricon that makes 3D perspectives accessible to everyone on multiple platforms. You can explore The Globe in 3D and add layers of information from your own data sources to enhance your analysis. You also can visualize your scene and share it with others. Vricon Explorer empowers you to tell a story, interact and do analysis across your entire domain.

Q. How many versions are there of Vricon Explorer?

A. There are three: Vricon Explorer Lite, Vricon Explorer Pro, and Vricon Explorer Targeting Edition. The following table compares a sampling of features across the three versions.

	Explorer Lite	Explorer Pro	Explorer Targeting Edition
Primary Users	General User	Power users & analysts	Special Forces
